PROJECT EXPERIENCE

Vessel Tracking System Aug 2020 – Nov 2020

- Technologies used: Java (Spring Boot), HTML, CSS, JavaScript
- Web Application to track and showcase information from client API, with automatic hourly and daily API calls

E-commerce Website

Aug 2020 – Present

- Technologies used: ReactJS, NodeJS, MongoDB
- Allows users to upload products into their shops for display

FBS Booker

Jan 2020 – May 2020

- Technologies used: Python (Selenium)
- Created a program to automate booking of facilities like Group Study Room in school's Facility Booking System (FBS), reducing process time by 30%

SGLoveLah

Jan 2020 – May 2020

- Technologies used: HTML, CSS, JavaScript, Python (Flask), AMQP (RabbitMQ), Docker, Python (Socket.IO)
- Created a sample dating website, blurs images and only unblurs upon both users pressing a "Ready Button"

Bidding Website for Students (Mock Version)**Aug 2019 – Nov 2019**

- Technologies used: AWS, WAMP, HTML, PHP
- Created a website for students to bid for modules using eCredits, based on bootstrapped data into the database
- Worked with a team following agile methodologies like scrum
- Experience in iteration-boxing for scheduling
- Implemented various CRUD (Create, Update, Read and Delete) functionalities using PHP and HTML
- Created JSON APIs using PHP and HTML
- Experience in the various software product lifecycle stages like testing and deployment

High-fidelity prototype**Aug 2019 – Nov 2019**

- Created a high-fidelity prototype website simulating a static webpage
- Experience in an iteration-based design process
- Applications of UI/UX for designing
- Conducted lab study and web experiment to improve design through A|B testing

CO-CURRICULAR ACTIVITIES

Coder's Assembly (Mentor)**Sep 2020 - Present**

- Served as a mentor to help freshman with Introduction to Programming module (taught in Python)
- Volunteered in a new initiative by Ellipsis (SMU Information System Student Society) to mentor freshmen in their Introduction to Programming module (taught in Python)
